

## International Dial Out Instructions

Use the information below to dial out to participants who are outside of North America.

### International Dial Out using Key Pad:

A host can dial-out to a participant who is outside of North America using their phone keypad.

1. Dial into your audio room as the host.
2. Once connected, dial 011 or 00, -(the country code), the local phone number of the participant and then #
  - a. For example, dialing a participant in Australia would be dialing  
01161282231111#  
OR 0061282231111#
3. When the participant answers, they will be connected to your audio room.

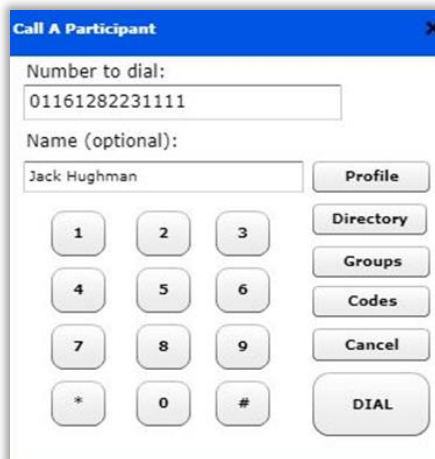

### International Dial Out using Click&Meet:

A host can dial-out to a participant who is outside of North America using Click&Meet

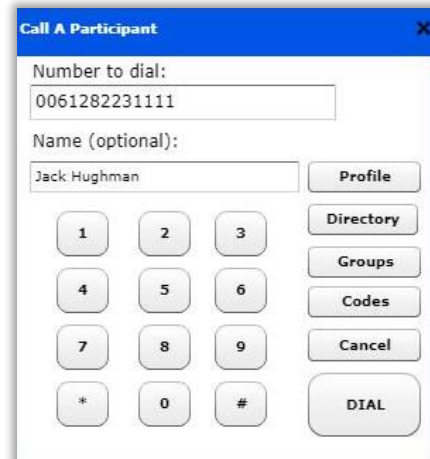

1. Sign into Click&Meet as the Host and connect to your room via your phone.
2. On the left icon bar, select the phone icon to call a participant
3. Enter 011 or 00, the country code and the local phone number of the participant. Optionally, you can enter the name of the participant as well. Then select "Dial"
4. Once the participant answers, they will be connect to your audio room.

Example: using 011 as the international prefix

A screenshot of the 'Call A Participant' dialog box. The 'Number to dial:' field contains '01161282231111'. The 'Name (optional):' field contains 'Jack Hughman'. There is a 'Profile' button next to the name. Below the fields is a numeric keypad with buttons for 1-9, \*, 0, and #. To the right of the keypad are buttons for 'Directory', 'Groups', 'Codes', 'Cancel', and 'DIAL'.

Example: using 00 as the international prefix
